Company Profile

1   Who we are? (About the Company)

Team who has passion for technologies, researching, learning and creating great software intensive solutions. Team who loves to help people to overcome their challenges, support the community and other businesses. Team who wants to instruct the young children not to dream of toys or sweets but instruct them to dream of infrastructure.

Hi there, we are Epic3!
We are software development company founded by experienced software engineers and managers in IT industry. We are located in Skopje, capital of Macedonia (Europe).

During the years of professional experience, we kept our focus on realization of business software solutions. Our main purpose is supporting businesses in the process of achieving their goals by providing bespoke software solutions / business applications. Our primary passion is utilizing technologies to build useful systems, but we fully understand the importance of delivering business values to our customers.
The success of our customers and partners who use our solutions, we consider our success too.

Thank you for your interest in our company.
We are looking forward to your message which will express your wish for more information about how we can help to you in the process of achieving your goals.

Why we? Because we care!

Best regards,
Petkovski, Petrushev, Buraliev

2   The story behind E3 (Background of the company)

3   How experienced are we? (Company competences)

We are small and young business (January 2017) but the members of our small team have significant experience in realization of software solutions and software intensive systems.

The Epic3 team members have over 15 years of professional experience in realization of bespoke software solutions. We provide software development services meaning that we are dealing with technologies, development platforms, servers, software frameworks, like lots of other software development service providers out there.

But, what we also understand and we are taking it in consideration as very important perspective of our work is:

- **Dedication**
  We can offer capacity that will be fully focused on tasks required by the accepted working agreement.

- **Quality communication**
  We understand that this is the basis for outstanding cooperation and we understand the

importance of having a communication on time for all issues, specific scenarios and risks so we can make a mitigation plan to minimize or prevent the undesired consequences.

- **Delivery approach**
  We have delivery-oriented mindsets, focusing on priority goals that has to be reached in a defined time frame. We love to use and utilized development but our approach is mostly focus on delivering business values for our customer.

Our core competences can be grouped in the following segments:

- Domain and industry knowledge
- Application lifecycle management experience
- Specific technologies, platforms and tools that we use to provide great solutions

4 Services

We provide software development services. Our list of services includes:

- **Project Management**
  We are collecting information about customer business needs and goals that has to be reached by developing the required software solution. After we have enough information we choose the project management approach which can be some of the:
  - Modern and agile approaches or (for instance Lean, Scrum)
  - Traditional and more formal approaches (for instance Waterfall)
  - Hybrid or custom methodology

- **Custom Development**
  Custom/Bespoke software development is a software that is specially developed for some specific organization or other user. This way we can have a focus to tackle the specific challenges of our customers and provide best possible solution for the business.
  This service includes:
  - Web, Mobile and Desktop applications
  - UI and UX Design & Prototyping
  - Enterprise Application Integration

- **Product Development**
- **QA Management and Testing**
- **Software Maintenance and Support**
- **Training for young software developers**

Our team members worked on projects for customers such as:

- Central Registry of Republic of Macedonia
- Business Registers Agency Serbia

5 Working Methodology

We are inspired by lean methodologies in both manufacturing and software development.

That's why we encourage our teams and coworkers to follow these basic lean principles:

- Eliminating the waste by selecting the truly valuable features for the system and deliver them in small batches.
- Empowering small teams that provide creative solutions where everyone is an expert in its field.
- Delivering as fast as possible so that valuable information can be extracted from the feedback earlier in the development process.
